

Recovery Roadmap

Strengths-Based, Person-Centered Inquiry

Date: _____

Person's Name: _____ Your name: _____

RATIONALE

Focusing solely on deficits in the absence of a thoughtful analysis of strengths disregards the most critical resources an individual has on which to build in his or her efforts to advance in his or her recovery. Therefore, the assessment of strengths and resources, including how they might inform the treatment plan, is an essential component of person-centered recovery planning. This assessment should be completed through in-depth discussion with the individual, and (with the individual's permission) through collateral contacts with the individual's family and natural supports. Note that these questions present a guide to shape conversation but you are free to modify both the content and the order in whatever manner facilitates connection with the individual.

INTRODUCTION

Today, I am going to be asking you a lot of questions so I can get to know you better. Some of the questions might be things like:

- *What do you like to do for fun?*
- *Who are the most important people in your life?*
- *What are your dreams for the future?*

You may wonder what these questions have to do with your mental health treatment. We think that these things can, or should be, a very important part of your recovery and care. Because sometimes the best way to deal with symptoms or things we struggle with is by using our strengths or things we are good at. Together, we'll learn more about those things, and talk a bit about how you might put them into action and include them in your recovery plan.

Your interests and activities

1. What does your “typical” day look like?
2. Are there ways that you could improve your day or make it more enjoyable?
3. What activities/hobbies do you enjoy at home? In the community?
4. Who do you enjoy these things with?
